Grade levels 3 and 4 are working with the bigger numbers (up to 10,000 and up to 100,000) and these sheets require a decent knowledge of place value of numbers and digits. In grade 4, math students will also learn how to sort and compare decimal numbers (up to hundredths). ... Our comparing and ordering worksheets are meant for math classes 1 ...

## **Comparing numbers and ordering numbers printable math ...**

Next, since 4 goes into 12 a total of 3 times, you would multiply the top and bottom of  $\frac{3}{4}$  by 3, which results in  $\frac{9}{12}$ . Finally, since both denominators are now the same, you compare the numerators (8 and 9) to determine which fraction is greater. Since 9 is greater than 8,  $\frac{9}{12}$  is greater than  $\frac{8}{12}$  -- therefore  $\frac{3}{4}$  is greater than  $\frac{2}{3}$ .

## **Comparing numbers worksheets and online exercises**

To compare and order fractions we must first convert all integers, mixed numbers (mixed fractions) and fractions into values that we can compare. We do this by first converting all terms into fractions, finding the least common denominator (LCD), then rewriting each term as an equivalent fraction with the LCD.

## **Ordering Fractions Calculator**

Convert these fractions to equivalent fractions with a common denominator in order to compare them. Follow these steps: List out the multiples. Multiples of 6 = 6, 12, 18, 24, ..... Multiples of 3 = 3, 6, 9, 12, ..... The smallest multiple the two denominators have in common is 6.
