The Common Object Request Broker Architecture (CORBA) is a standard defined by the Object Management Group (OMG) designed to facilitate the communication of systems that are deployed on diverse platforms. CORBA enables collaboration between systems on different operating systems, programming languages, and computing hardware. CORBA uses an object-oriented model although the systems that use the ...

Common Object Request Broker Architecture - Wikipedia

I believe this has been done mainly to focus on CORBA rather than C++. All programming examples are well thought out. This is "The Book on CORBA" as Doug Schmidt says in the foreword. Looking forward to the next edition that would cover DSI, DII etc (preferably from the same authors). The word "advanced" in the title is misleading.

With Victoria Hamilton, Richard Dormer, David Haig, Lucy Cohu. As widespread power outages cause chaos and threaten lives across the country, the COBRA committee comprised of the UK's leading experts and politicians, gathers to find a way to turn the lights back on.

Cobra (TV Series 2020-2021) - IMDb

Cobra Speed Controllers are simple to program, and in most cases, they can be used right out of the package. Three of the Speed Controller parameters can be set without a programming card: Brake Mode, Battery Type, and Timing mode. The remaining parameters can be set with the optional ESC Programming Card, which is available separately.
