A good tip for digital SLR users is to shoot in the RAW format (which you should do for the best quality colour to black and white conversions anyway) but set the Picture Style (this is Canon's term - check your instruction manual if you have another brand of camera) to a black and white mode. The photo will be displayed in black and white on the camera's LCD screen, and you'll have all the colour information in the RAW file for your conversion afterwards.
