Animals Science A Z

Animals. The world is full of many types of animals. Animals share several common needs, but they also have diverse habits and characteristics. The unit Animals helps students discover what makes animals similar and what makes them different. Topics include habitat, diet, body parts, movement, special abilities, and more.

Science A-Z Animals Grades K-2 Life Science Unit

A-Z Animals was founded on three guiding principles: accurate content you can trust, spreading knowledge on the animal kingdom, and giving back. Today, more than 30,000 species are threatened with extinction, and thousands would already be lost without tireless conservation efforts. Knowing that the first step toward conservation is spreading knowledge of the incredible animals species across our planet, A-Z Animals was founded in 2008 to offer an online encyclopedic resource across animals ...

Animals, Animals | Reading A-Z

Animal Science is also concerned with foods of animal origin: meat, dairy foods, and eggs. The food industry is one of the largest and most important industries in the United States. In addition, animal science is concerned with aspects of companion animals, including their nutrition, care, and welfare. If you are interested in efficient production of food animals, processing and consumption of high-quality meats and dairy products, use of companion animals for recreation or leisure purposes
