The caliper guide pins are two round metal pins on each brake caliper where the brake piston assembly sits. They're called guide pins because they're responsible for guiding the proper angle for how the brake pad meets the rotor. On the next page, we'll explore how to determine whether or not your brake caliper guide pins are causing problems, and explain how to fix them if they are.

As a result, the caliper piston tends to stick in the caliper bore, forcing the disc pads to drag against the rotating disc brake caliper. Brake Caliper Service. Like disc brake rotors, disc calipers are more easily replaced than serviced. Since the caliper's main casting is rarely damaged, the remanufacturer cleans the caliper and installs a ...

### **Remanufacturing Brake Calipers | Know Your Parts**

The brackets alone are usually very difficult to find at a reasonable price. There's really no reason to buy new calipers, unless you can't find the brackets by themselves, or your calipers are in poor condition. In that case, I believe you can get a loaded Outlander caliper, or rebuild your current calipers, which is a more inexpensive option.

### **Duralast Calipers | DSMtuners**

With power brakes, the pedal should stop 1 to 1-1/2 inches from the floor. (If you don't have power brakes, the pedal should stop more than 3 inches from the floor.) If your vehicle has power brakes and stopping seems to take excessive effort, you may need to have the power booster replaced.

### **How to Troubleshoot Brake Problems - dummies**

The pistons in brake calipers are responsible for the brake pads making contact with the brake discs and consequently slowing the car, so they're a vital component of the braking system. When you put your foot on the brake pedal, brake fluid is forced from the master cylinder, down the brake pipes and into the brake caliper, where it pushes ...
