Dialogue mapping : building shared understanding of wicked ...

Dialogue Mapping. Oversimplifying it a bit, dialogue mapping is using the IBIS notation and a shared display to facilitate a meeting. The shared display is simply using a projector or TV to allow everyone in the meeting to see what the dialogue mapper is recording. It holds everyone together and ensures that everyone feels their point is heard.

Book Review-Dialogue Mapping - Thor Projects Blog

Dialogue mapping Issue mapping is the basis of a meeting facilitation technique called dialogue mapping. In dialogue mapping, a person called a facilitator uses IBIS notation to record a group conversation, while it is happening, on a "shared display" (usually a video projector).

Issue-based information system - Wikipedia

This shared understanding is the objective that the dialog mapping process addresses, and that the software supports. The idea is to capture the questions with which the group is occupied, possible answers to those questions, and arguments for and against them in a visual display in a way that gives all participants a sense that their concerns have been heard and understood.
