### **Chapter 3 Case Study Projects | Evaluation of Project ...**

There are different types of case studies, which can be used for different purposes in evaluation. The GAO (Government Accountability Office) has described six different types of case study: 1. Illustrative: This is descriptive in character and intended to add realism and in-depth examples to other information about a program or policy. (These are often used to complement quantitative data by providing examples of the overall findings).

### **Case Study | Better Evaluation**

Evaluation research is the systematic assessment of the worth or merit of time, money, effort and resources spent in order to achieve a goal. Evaluation research is closely related to but slightly different from more conventional social research. It uses many of the same methods used in traditional social research, but because it takes place within an organizational context, it requires team skills, interpersonal skills, management skills, political smartness, and other skills that social ...
