Foundations Of Python Network Programming - Complete.Org

Python Network Services. There are two levels of network service access in Python. These are: Low-Level Access; High-Level Access; In the first case, programmers can use and access the basic socket support for the operating system using Python's libraries, and programmers can implement both connection-less and connection-oriented protocols for programming.

Python Networking Programming - W3Schools

This second edition of Foundations of Python Network Programming targets Python 2.5 through Python 2.7, the most popular production versions of the language. Python has made great strides since Apress released the first edition of this book back in the days of Python 2.3. The advances required new chapters to be written from the ground up, and others to be extensively revised.
