Repair options from the Control Panel. In the search box on the taskbar, type Control Panel and select it from the results. Select Programs > Programs and Features. Right-click the program you want to fix and select Repair, or if that's not available, select Change. Then follow the directions on the screen.

Repair apps and programs in Windows 10

If the automatic repair using Startup Repair did not help, boot your computer from Windows boot/installation disk or in the WinRE environment (Repair your computer -> Troubleshoot -> Advanced options -> Command Prompt). Start the command prompt and try to create a new BCD file and update the MBR record from scratch.

How to Rebuild BCD File and Master Boot Record (MBR) in ...

If the Windows boot configuration data (BCD) store is missing, corrupted or improperly configured, Windows can't start. The easiest solution to a BCD issue is to simply rebuild it, which you can do automatically with the bootrec command. There are several commands to run and lots of output on the screen, but rebuilding the BCD is a very straightforward process.
