### Identity Economics How Our Identities

How identity influences the economic choices we make Identity Economics provides an important and compelling new way to understand human behavior, revealing how our identities—and not just economic incentives—influence our decisions. In 1995, economist Rachel Kranton wrote future Nobel Prize-winner George Akerlof a letter insisting that his most recent paper was wrong.

### Identity Economics: How Our Identities Shape Our Work ...

Identity economics is a new way to understand people's decisions--at work, at school, and at home. With it, we can better appreciate why incentives like stock options work or don't; why some schools succeed and others don't; why some cities and towns don't invest in their futures--and much, much more. Identity Economics bridges a critical gap in the social sciences. It brings identity and norms to economics.
