Apple says that it refurbished 11.1 million devices for new users in 2019, and notes that each one “represents a smarter and more environmentally efficient use of the resources and materials we rely on to build our products.” Yet that laudable commitment has long been in tension with the company's drive to sell new devices.

Is Apple really as green as it claims? Here's a look into ...

Gateshead council said total tonnage of recycling collected between April and July 2020 was up by 23% compared with last year, with a record 250% rise in cardboard recycling. Story continues In Devon , which already has one of the highest recycling rates in the country, at 56%, saw recycling rates rise by 12% between April and June this year.
