Malaria Journal is aimed at the scientific community interested in malaria in its broadest sense. It is the only journal that publishes exclusively articles on malaria and, as such, it aims to bring together knowledge from the different specialties involved in this very broad discipline, from the bench to the bedside and to the field.

Malaria Journal. The exponential growth of Malaria Journal over the past nine years can be explained by a combination of factors: having been the first open access journal in tropical medicine, created at the very start of the Open Access movement, having a prestigious and dynamic Editorial Board, making the effort to copy-edit all articles in a traditional fashion, and helping less-experienced authors from the developing world to reshape their manuscript to an acceptable standard.

Background Malaria, remains one of the leading causes of high morbidity and mortality in Nigeria despite implementation of several public health interventions for its control. Operational limitations and methodological gaps have been associated with malaria control interventions and research, and these have necessitated the need for a well-tailored Malaria Operational Research (MOR) agenda.

Malaria is a serious disease caused by a parasite. You get it when an infected mosquito bites you. Malaria is a major cause of death worldwide, but it is almost wiped out in the United States. The disease is mostly a problem in developing countries with warm climates. If you travel to these countries, you are at risk. There are four different types of malaria caused by four related parasites.
