We will look at some unusual solids, liquids and gases and what happens to them at extreme temperatures.

KS3 Science - Solids, Liquids & Gases (1/4) - Tutor Led ...

This KS3 Science quiz takes a look at solids, liquids and gases. The three states of matter are solids, liquids and gases. Matter is a general term for the substance of which all physical objects are made. All matter is actually made up from atoms. Matter is very varied but it has predictable properties. The kinetic theory is a useful idea that can be applied to any matter in order to explain or describe its physical behaviour.

States of matter worksheet KS3 Year 7 - particles of ...

Solid water is called ice. This is water with the lowest energy and temperature. When solid, the molecules in water are held tightly together and don't move easily. Liquid water is just called water. As ice heats up it will change phases to liquid water. Liquid molecules are looser and can move about easily. Gas water is called steam or vapor.
