Horace Mann, a pioneer of American public schools in the 19th century, famously called education the “great equalizer of the conditions of men.” But the inverse is also true. Students who receive a poor education, or who drop out of school before graduating, can end up on the wrong side of a lifelong gap in employment, earnings, even life expectancy.

Death has long been called the Great Equalizer. This investigation says no, in fact it is not. The same inequities that complicate life for so many people can also determine when and how they die. That’s the case before the pandemic, throughout the virus’s spring rampage, and, without hard changes, long after the disease is out of our lives.

The Great Equalizer: How the Internet levels the playing field. The twin towers of the Chicago Mercantile Exchange soar 40 stories above downtown Chicago, flanking a two-story building which houses the Merc's trading floors where live cattle and other commodities are sold. The Merc is a noisy, frantic place marked by pandemonium in the trading pits.
