This is a quick way to multiply two-digit numbers by 11 in your head. Separate the two digits in your mind. Add the two digits together. Place the number from Step 2 between the two digits. If the number from Step 2 is greater than 9, put the one's digit in the space and carry the ten's digit. Examples:  $72 \times 11 = 792$ .

### **10 Math Tricks That Will Blow Your Mind - ThoughtCo**

Magic tricks suggest mathematical problems, and mathematical solutions suggest magic tricks. Sometimes an innovation on one side spurs an innovation on the other side. In addition to instruction in magic and mathematics, Magical Mathematics tells stories of mathematical magicians, including some who influenced the authors.
