CCOHS: Manual Materials Handling (MMH)

In this study, approximately 4000 US postal workers were involved in a randomised control trial * for more than five years from 1985 to 1990, to test the effectiveness of manual handling training. The study included workers and supervisors being taught principles of back safety, core lifting and handling posture, exercises and pain management.

Manual tasks | SafeWork NSW

While not all manual handling is unsafe, hazardous manual handling may occur when work requires a person to use force to lift, lower, push, pull, carry or otherwise move, hold or restrain something. Employers need to find all the work that involves hazardous manual handling, and determine whether the work poses a risk.
