Space Shuttle News Reference Manual NSTS 1988 News Reference Manual Editors NOTE: This document is an exact hypertexting of the NSTS News Reference manual that was handed out to the press in September 1988. It is online for historical purposes only and does not reflect the many changes or improvements to the Shuttle Fleet after that date.

Space Shuttle News Reference Manual - Kennedy Space Center ...

The Manned Maneuvering Unit (MMU) is an astronaut propulsion unit that was used by NASA on three Space Shuttle missions in 1984. The MMU allowed the astronauts to perform untethered extravehicular spacewalks at a distance from the shuttle. The MMU was used in practice to retrieve a pair of faulty communications satellites, Westar VI and Palapa B2. Following the third mission the unit was ...

The Shuttle Reference Manual, most recently revised in 1988, is an in depth technical guide to space shuttle equipment and operations. It was accurate in 1988 and while most of the information provided here from the manual is still accurate today, some facts may be outdated. A verbose index of the Manual is also available.

HSF - NASA Human Space Flight

Space Shuttle missions are hyphenated between the "STS" and the number (e.g., STS-51L, STS-107). Capitalization. Some guidelines for capitalizing terms: Scientific or technical terms (and, for that matter, all terms) containing a proper name should be capitalized. This holds true whether the name is used in the possessive form or not.
