This treatment is accomplished by naturally occurring endophytic microbes and enhanced aerobic/anaerobic biodegradation in the soil column. Our system is the only one of its kind and has a unique record of documented success in over 25 states and 4 countries.

### **Applied Natural Sciences, Inc.**

Enhanced remediation monitors the behavior of unknown processes and backs up changes that they make to the system. If a monitored process exhibits malicious behavior, enhanced remediation stops the process, its children, and ancestors, and rolls back the changes that it made, restoring the system as close as possible to its original state before the process ran.
