In fields such as anthropology, behavioral biology and ecology, watching a person or organism in a natural environment is essential. Most naturalistic observation is unobtrusive, such as a researcher setting up a camera to film the behavior of a badger underground. Most nature documentaries are examples of naturalistic observational study, where days, weeks or even years of film are analyzed and edited, to give an overview of the life cycle of the organism.

Naturalistic Observation - Research in the Natural Environment

A woman was there with her two kids. The kids ran around causing chaos while the mom ignored them and let them run wild. I observed it without letting them know I was observing them. That is naturalistic observation.

What are some examples of naturalistic observation? How is ...

This type of research is called naturalistic observation. The goal of naturalistic observation is that you watch a naturally occurring behavior and not influence it in any way. People who know they are being watched may not act naturally. Bring a pad of paper along with you and take notes about the things that you find interesting.
