Note: When a Google Drive user requests to download a file, or when the file is downloaded through the sync client, Drive builds a full filename (with extension) based on the name. In cases where the extension is missing, Google Drive attempts to determine the extension based on the file's MIME type.

Description. file determines the format of each file by inspecting the attributes and (for a regular file) reading the contents of the file. If the file is an executable, its addressing mode is determined for output. If file is not an executable, file compares each file to entries found in one or more magic files to determine their file type. If you specify - as a file name, file reads from the ...
