You'd be surprised how many people collect rocks and how valuable some finds can be, yet it can be a bit overwhelming to get started rock hunting.

Rock & Mineral Collecting: A Beginners Guide to Finding

...

If you are looking for small rocks or mineral samples, then zip-loc bags may be all you need. Bring a permanent marker to write on the bag. Another thing you can do is use blank business card stock, write your field notes on that, and throw it in the zip loc bag with the rock sample.

The Ultimate Guide To Rockhounding Tools and Supplies

Geologists usually use pointed-tip rock hammers in areas of metamorphic and igneous rocks. The flat end of the hammer is used for breaking rocks and for light chisel work. The pointed end is used to loosen rocks embedded in soil and as a digging tool. The 14-ounce hammer is used for light work and by people who prefer a lightweight tool.

Best Rockhounding Books For 2020 (Rocks, Minerals and ...

Bedrock: Exposures and Outcrops While beaches and rivers are good places for beginners to launch their education in rock collecting, for a more serious study of rocks, you'll need to find exposed bedrock. Bedrock—or living rock—is an intact formation that has not been broken away from its original body.

Where to Find Specific Types of Rocks and Minerals

Igneous rocks such as granite or lava are tough, frozen melts with little texture or layering. Rocks like these contain mostly black, white and/or gray minerals. Sedimentary rocks such as limestone or shale are hardened sediment with sandy or clay-like layers (strata). They are usually brown to gray in color and may have fossils and water or wind marks.

Everything You Need to Identify Rocks

To a beginner rockhound, 'collecting rocks, gems and minerals' is worth it for the pictures alone. The descriptions include commercial uses and lapidary uses for the stones, areas they're commonly found, and values. There are sections on locating and collecting, uses and care of rocks, and buying and selling.
