General Interest in Rose Engine Lathes - Today

The Lindow Rose Engine is a mid-sized machine that is loosely patterned off of traditional American machines meant to bring rose engine turning to a broader market by having a machine in the mid-price level. This allows anyone with a serious interest to be able to afford one.

Lindow Machine Works

Rose engines are purpose built and differ from ornamental lathes in that the spindle is fixed to a pivot point below the lathe bed and rosettes (multi-lobed cams) are employed to cause the spindle to rock back and forth or pump from right to left while the work is slowly turning, usually at about 3 RPM.

New Mexico Woodturners - Sharing the art of woodturning

At the end of the demonstration there will be a silent auction for a finished piece Eddie has produced with the Rose Engine Lathe. This piece will more than likely be made from something like English box wood, African blackwood, or something of similar density. We will also have some other items to auction off during the demonstration.
