It is happening all around us - a tiptoe toward a totalitarian world in which a super-rich, super-callous 'elite' live in high-tech luxury while the rest of the population is subject to increasing global structures of fascist control. And it's no accident. This vision for our society is detailed in a plan being imposed through the United Nations called Agenda 21.

Agenda 21: The United Nations Plan for a Global Fascist ...

Sub-replacement fertility is a total fertility rate (TFR) that (if sustained) leads to each new generation being less populous than the older, previous one in a given area. The United Nations Population Division defines sub-replacement fertility as any rate below approximately 2.1 children born per woman of childbearing age, but the threshold can be as high as 3.4 in some developing countries ...

Sub-replacement fertility - Wikipedia

rural flight: A term used to describe the migratory patterns of peoples from rural areas into urban areas. urbanization: The physical growth of urban areas as a result of rural migration and even suburban concentration into cities. counterurbanization: A demographic and social process whereby people move from urban areas to rural areas.

Community-based approaches existed even before the existence of the state and its formal governance structure. People and communities used to help and take care of each other's disaster needs. However, due to the evolution of state governance, new terminology of community-based disaster risk reduction (CBDRR) has been coined to help communities in an organized way.

Introduction. An emerging global problem is the long-term decreasing stock of agricultural land per capita. Statistics on future growth of the world population from the United Nations Food and Agriculture Organization (FAO) reveal that arable land per person is projected to decrease by 2050 to one-third of the amount available in 1970 (FAO 2016). This decline is forecasted to continue due to ...

WORLD WAR II AND THE ENDING OF THE DEPRESSION. World War II had a profound and multifaceted impact on the American economy. Most obviously, it lifted the nation out of the Great Depression of the 1930s. As late as 1940, unemployment stood at 14.6 percent; by 1944 it was down to a remarkable 1.2 percent, and the gross national product (GNP) had more than doubled.
