Make to Order strategies – Strategy 20 | SAP Blogs

Make to order production is a process in which a product is individually manufactured for a particular customer. Stock keeping is not usually carried out for products that are made to order. The primary benefits of this process are the ability to track the progress for the sales order and the flexibility to offer to the customer the products to meet their specific requirements.

Make to Order (MTO) and Make to Stock (MTS)

The Made TO Order Cycle: The sale department passes on the Made to order-Sales Order to the Material department so that material requirement is analyzed. This is done in SAP by carrying on an MRP Run for all the levels of the product BOM. This MRP Run would create Planned Orders for the shortages.
