What IS Science? or Science as Story-Telling or Science as a Common Human Story of Exploration, Discovery, and Creation or Finding Ways to Make it So An exhibit. Revisiting Science in Culture: Science as Story Telling and Story Revising A published paper.

## **Science and Culture**

The 'Science in Culture' theme aims to develop the reciprocal relationship between the sciences on the one hand, and arts and humanities on the other. The sciences and the arts and humanities often seek to answer very different kinds of questions about human nature, the nature of the world we inhabit, and the relationship between the two.

Other books explore the cultural impact of science or the relationship between science and faith. Several of these works—such as Darwin’s Black Box, The Design Inference, Signature in the Cell, and The Privileged Planet —have re-shaped debates in both science and culture by bringing new evidence to bear on important questions.

Science and Culture (1880) Collected Essays III [134] Six years ago, as some of my present hearers may remember, I had the privilege of addressing a large assemblage of the inhabitants of this city, who had gathered together to do honour to the memory of their famous townsman, Joseph Priestley; 1 and, if any satisfaction attaches to posthumous glory, we may hope that the manes of the burnt-out ...

## **Science and Culture (1880)**

Insofar as Science and Technology are radically universal, this is evidence that specific societies and cultures have no influence on them. On the contrary — Science and Technology transcend all national boundaries and appeal to what is common to all people, regardless of nation, local culture, or level of development.
