series of cases that have occurred due to the lack of human factors in the design of a product.

The Internet Encyclopedia of Technology and Culture

This book introduces important human factors issues using a series of real cases and incidents from health care and a variety of other industries. The title refers to the disastrous death of a patient due to a design flaw in the radiotherapy accelerator, Therac-25. A plausible but unanticipated series of keystrokes by the operator resulted in the delivery of more than 100 times the intended ...
