Gastric bypass surgery. Before gastric bypass, food (see arrows) enters your stomach and passes into the small intestine. After surgery, the amount of food you can eat is reduced due to the smaller stomach pouch. Food is also redirected so that it bypasses most of your stomach and the first section of your small intestine (duodenum).

Dumping syndrome - Symptoms and causes - Mayo Clinic

Simple liver cysts — fluid-filled cavities in the liver — usually cause no signs or symptoms and need no treatment. However, they may become large enough to cause pain or discomfort in the upper right part of the abdomen.
