Site Analysis A Contextual Approach To Sustainable Land ...

Architectural site analysis, is the process of evaluating a particular locations physical, mental and social characteristics with the ambition of developing an architectural solution that will both address and enhance its internal and external context. "To develop a project of any merit, its site must first be measured"

Introduction To Architecture Site Analysis — Archisoup ...

A contextual analysis is a research activity that looks at the existing conditions of a project site, along with any imminent or potential future conditions. The purpose is to inform us about a site prior to the start of our design process so that our initial design thinking about a site can incorporate considered responses to the external conditions.

Architecture Site Analysis Guide - Data Collection to ...

Site analysis is a preliminary phase of architectural and urban design processes dedicated to the study of the climatic, geographical, historical, legal, and infrastructural context of a specific site. The result of this analytic process is a summary, usually a graphical sketch, which sets in relation the relevant environmental information with the morphology of the site in terms of parcel, topography, and built environment.

Site analysis - Wikipedia

Site Analysis A Contextual Approach To Sustainable Land ...

A context-sensitive approach to sustainable planning and development helps to protect public health, safety, and welfare. By avoiding inherent site problems, or constraints, and by capitalizing on inherent site assets, or opportunities, site planners can limit long-term maintenance costs and, more important, reduce the risks to life and property from natural hazards.
