To insert an SQL expression field - help.sap.com

The function expressions in SAP HANA scripting includes all the SQL built-in functions that you can use as expressions in SQL scripts. Syntax: <function_expression> ::= <function_name> (<expression> [{, <expression>}...]) 3. Aggregate Expressions. The aggregate expressions in SAP HANA essentially use aggregate functions to carry out complex calculations. Aggregate expressions evaluate single values from a set of multiple values taken from multiple rows of a data table.
