Student Explorationfall Laboratory Answer Key [PDF]

Correct Answer: A. The shuttlecock began 7 meters above the ground, and fell through a vacuum.
When a Lunar Module landed on the Moon, it used thrusters to slow its descent to the surface.
When other spacecraft are returned to Earth, they use parachutes to slow their descent.

Student Explorationfall Laboratory Answer Key

Free-Fall Laboratory. Investigate the motion of an object as it falls to the ground. A variety of
objects can be compared, and their motion can be observed in a vacuum, in normal air, and in
denser air. The position, velocity, and acceleration are measured over time, and the forces on the
object can be displayed.
