Your SediVue Dx Urine Sediment Analyzer may include sample messages in the patient report. These messages are generated based on numerical results and are intended to provide you with further insight and guide you with recommended next steps. When a bacteria result is "suspect presence" When samples are crowded with overlapping elements

Understanding SediVue urinalysis results - IDEXX US

urine sediment examination This is the final stage of a complete urinalysis. It can confirm suspected findings from earlier stages of the analysis as well as facilitate visual inspection of structures in the sample e.g. casts, cells or crystals. Before examining the sediment the urine must be centrifuged or "spun down" to

concentrate the sample.
